

Industry 4.0

Technologies for the factory of the future

Prof. Dr.-Ing. Dr. h.c. Detlef Zuehlke

Director Innovative Factory Systems Dept. IFS
German Research Centre for Artificial Intelligence , DFKI Kaiserslautern
and
Executive Chairman SmartFactory KL e.V.

German Research Center for Artificial Intelligence (DFKI)

780 employees
18 Professors
>40 Mio € Turnover

since 07/1988

Location Kaiserslautern

- Augmented Reality
- Embedded Intelligence
- Knowledge Management
- Innovative Factory Systems

smartFactory^{KL}

since 07/1988

780

Location Saarbrück

since 11/2005

Location Bremen

since 05/2012

Location Berlin

Lab Osnabrück

- the basics
- the changes
- the smartfactory
- conclusion

Our smart world

All
applications

Worldwide
network

*Information will be available
anywhere, anytime, with any content, for any user
using any device and any access*

All locations

All ages

Have fun

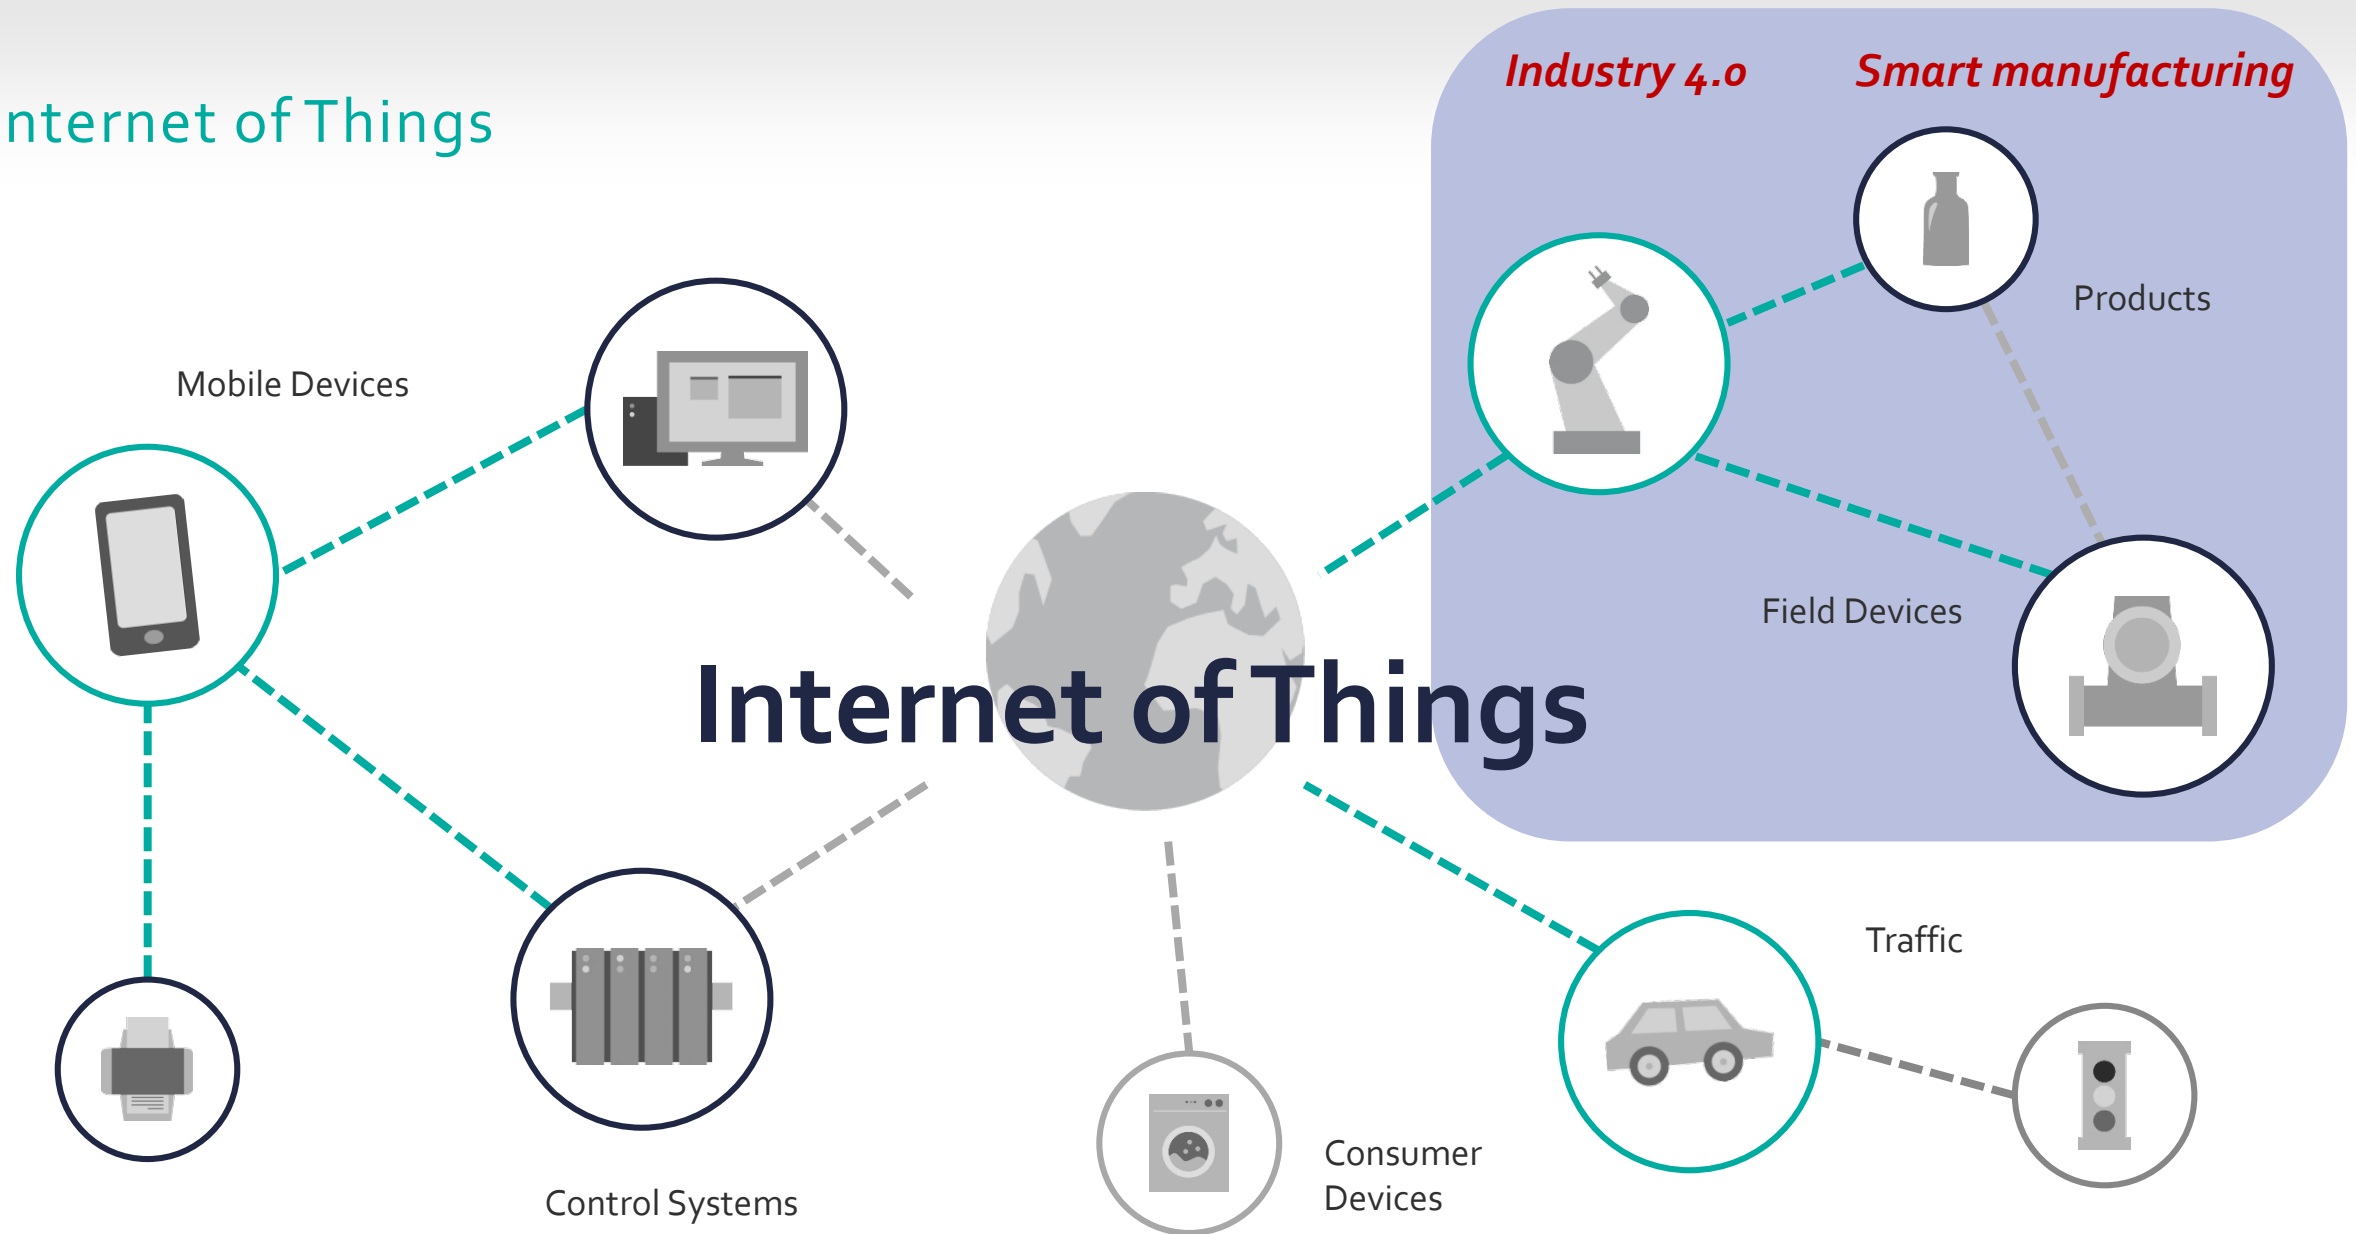

always „ON“

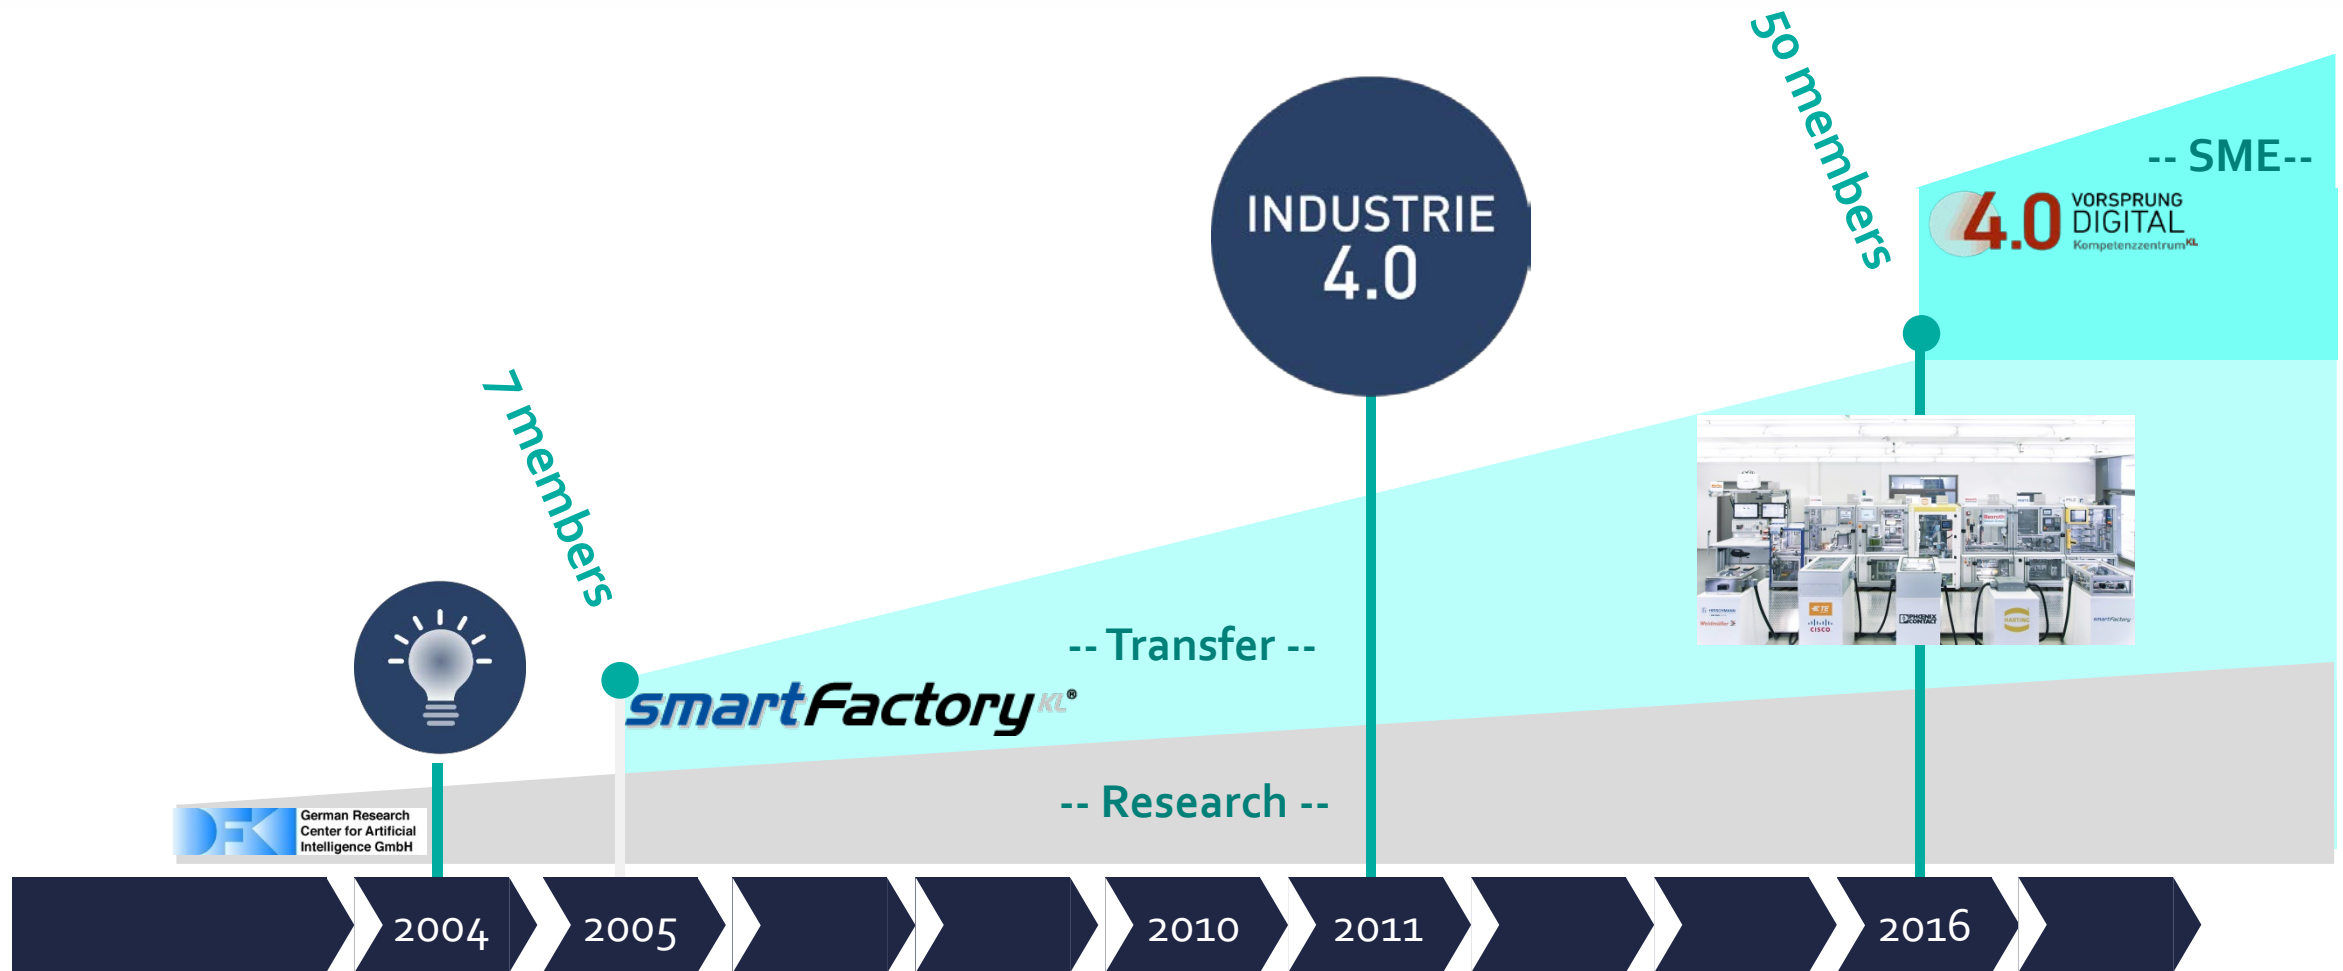

Apps all over

Internet of Things

The Industry 4.0 / SmartFactory^{KL} History

What is Industry 4.0?

Digitization and networking
of all processes, products and resources

Pervasive
Engineering

Internet
of Things

Big Data

Smart products

Virtual <->
real world

Human and
work

Standardized
Interfaces

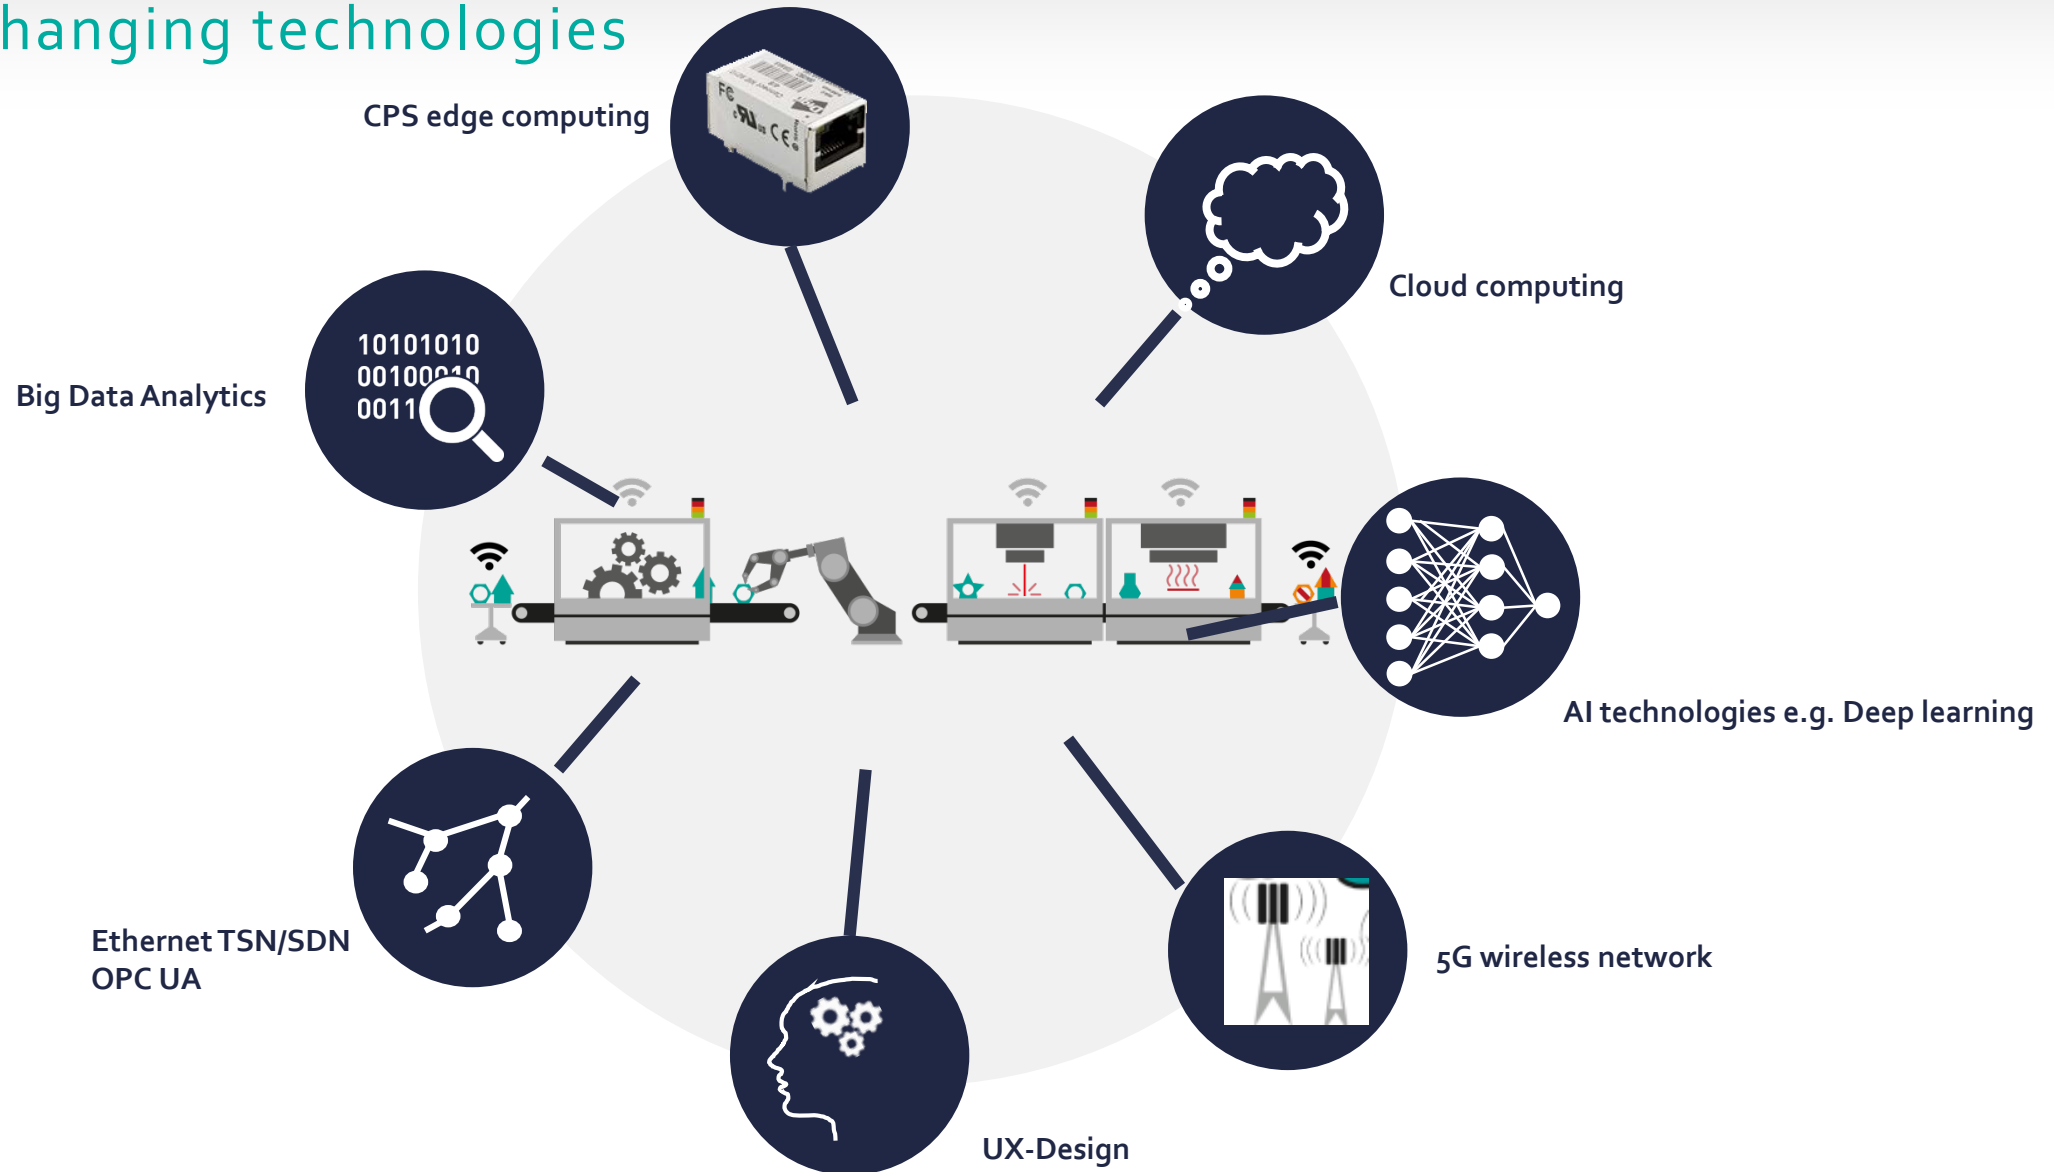

It's not a standard

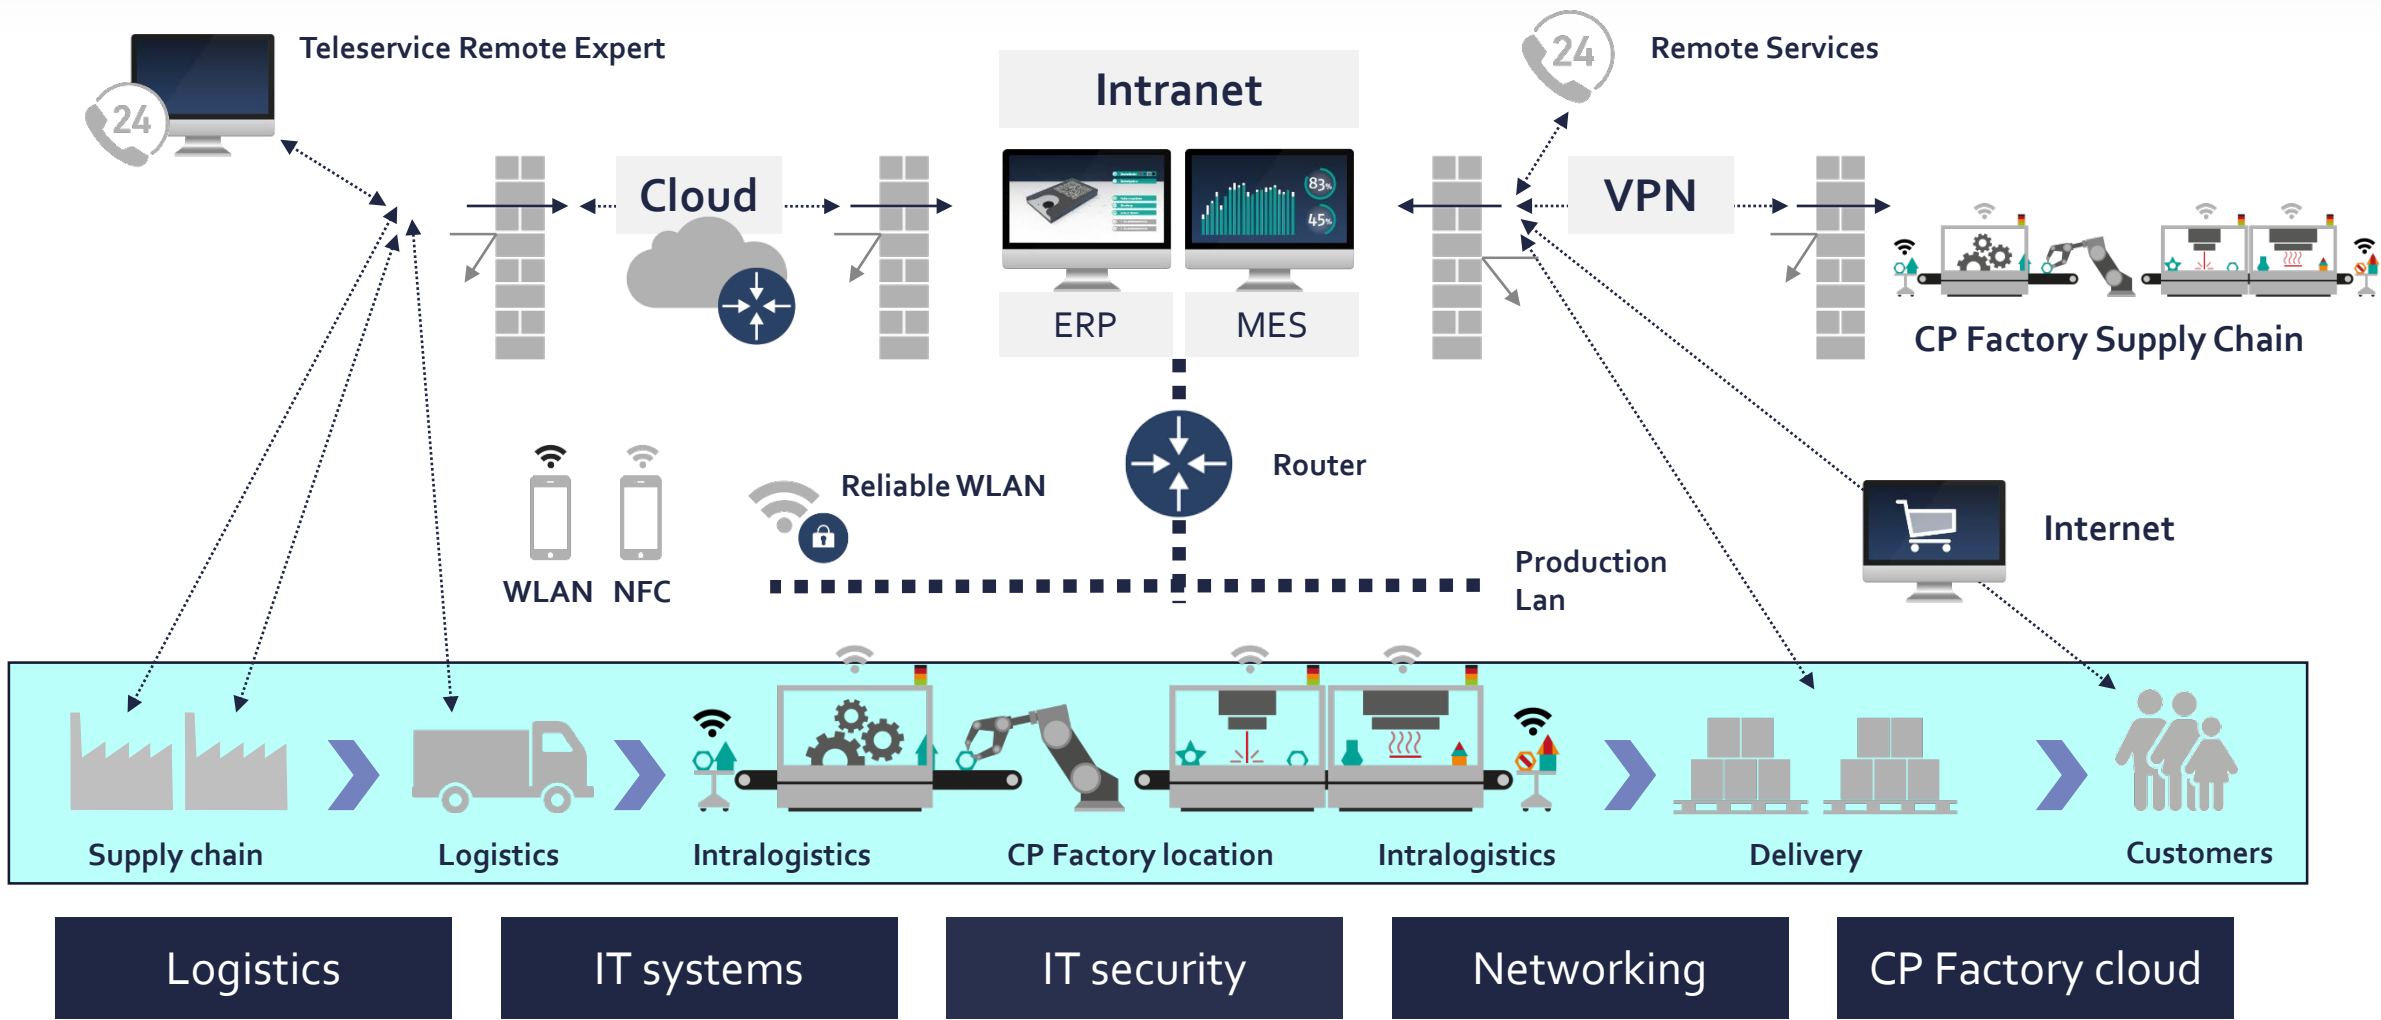

INDUSTRIE 4.0

It's not clearly defined

Game changing technologies

Digital Transformation of the Industry

- the basics
- the changes
- the smartfactory
- conclusion

Customer's changing paradigms

Paradigm of the past

Cheap, cheaper, cheapest!

Paradigm of the future

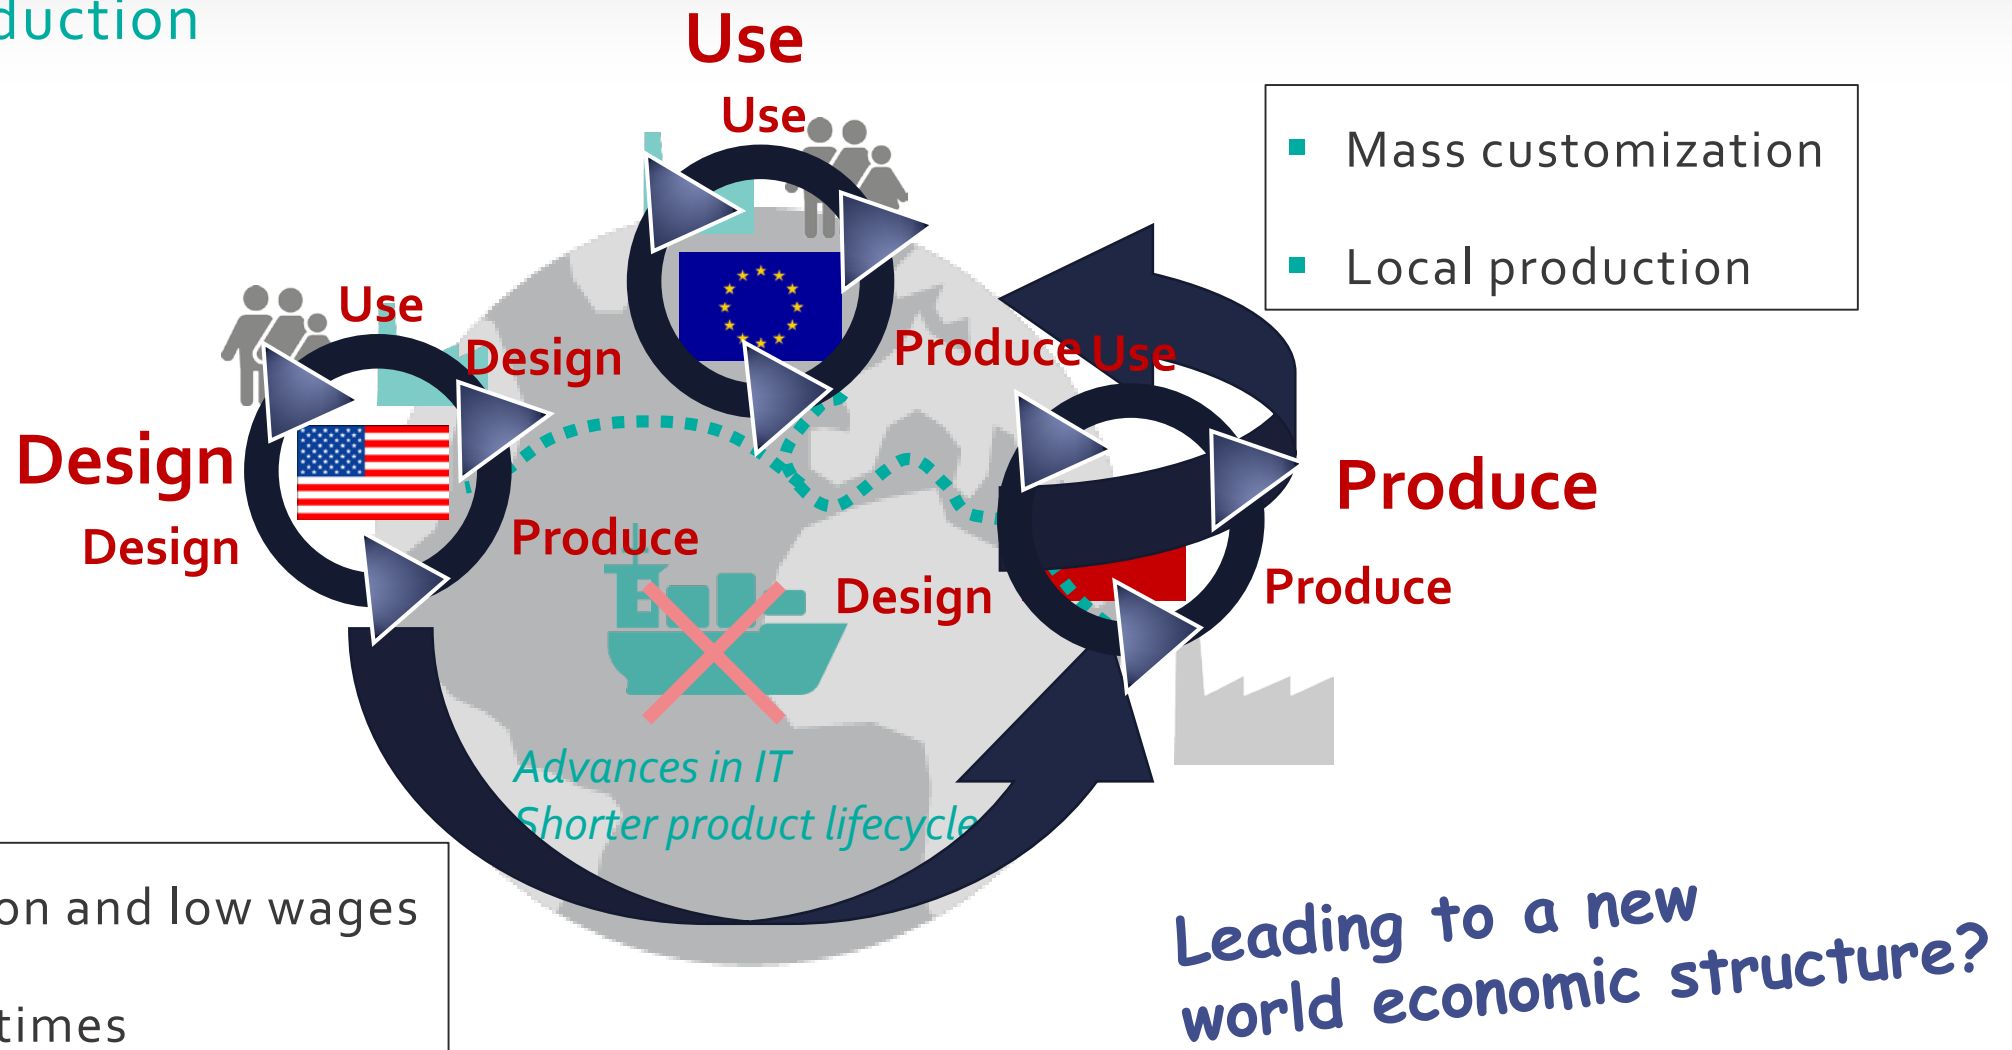

*Order by a mouse click
get YOUR product tomorrow!*

Personalized products are coming

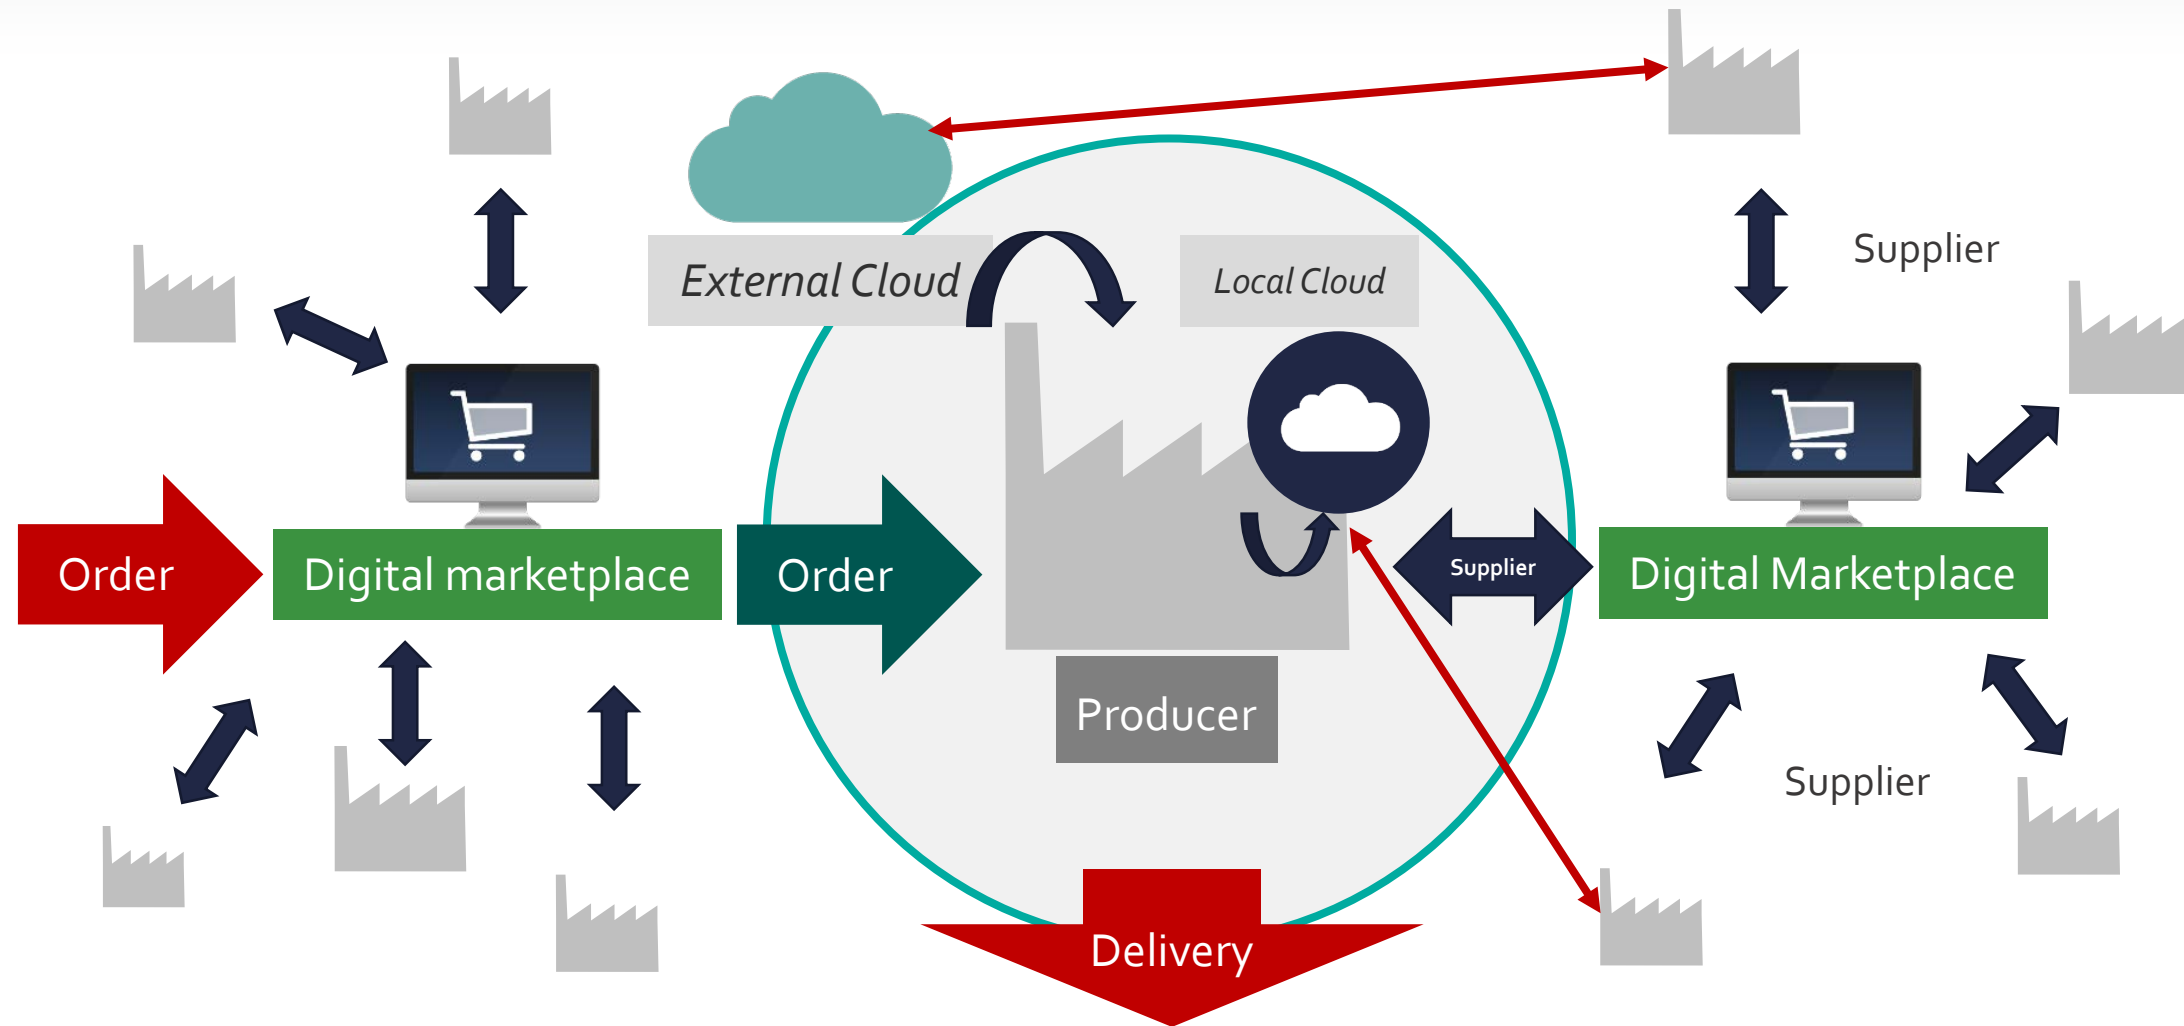

Reshoring production

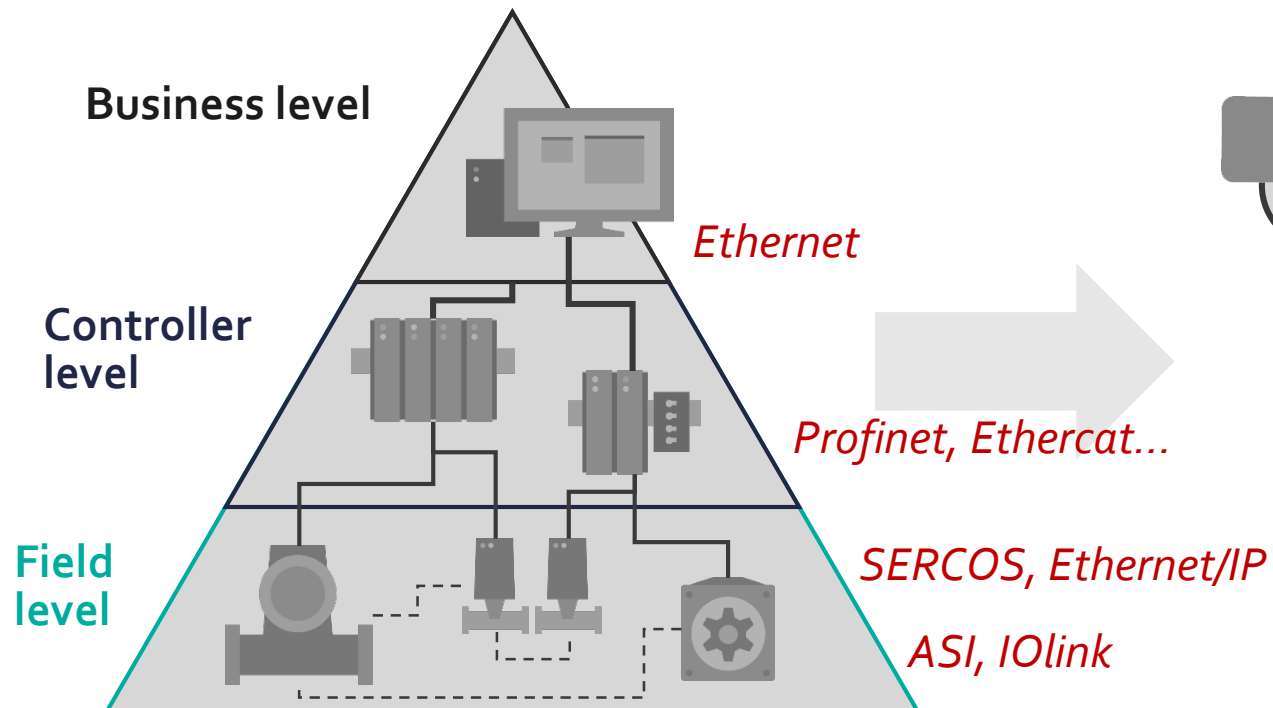

The network is the future

Production in networks

Digitization | from Pyramid to Network Structures based on worldwide standards

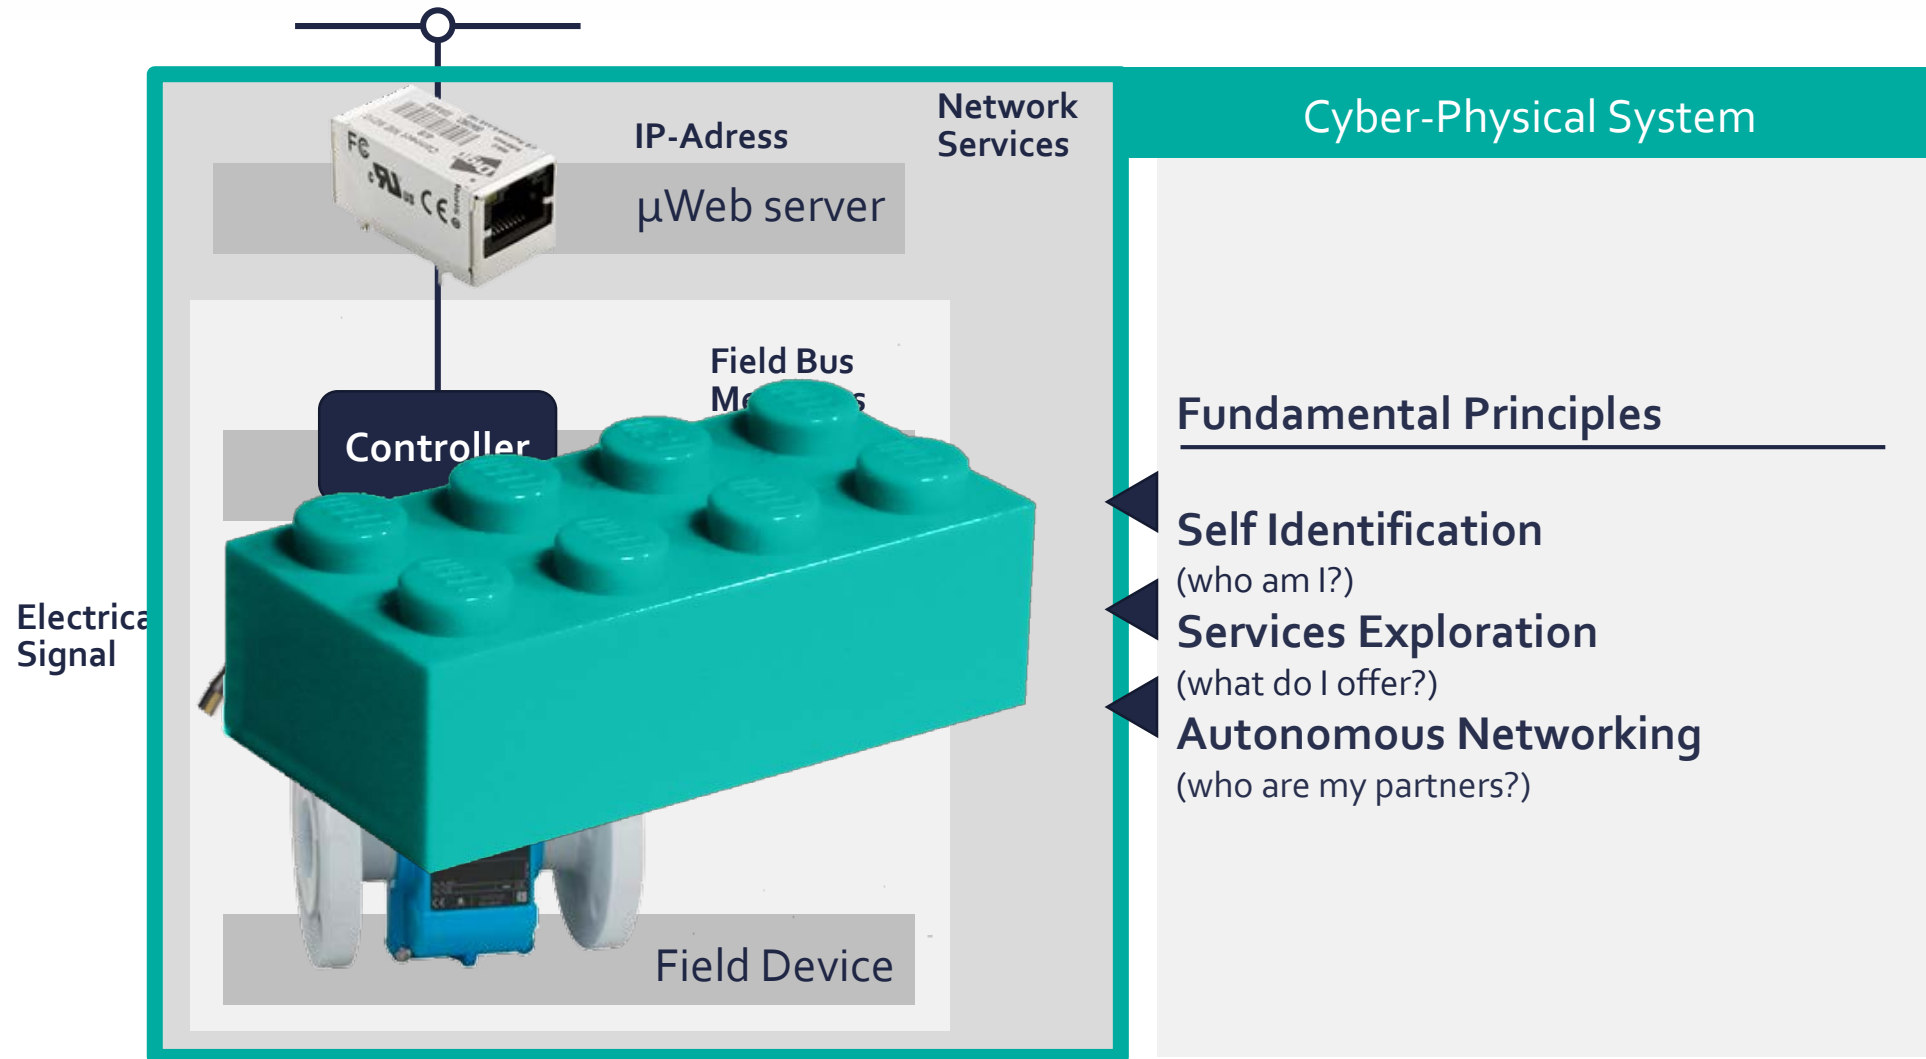

Rigid structures today

Dynamic structures tomorrow

Towards smart modules

The modular agile factory kit

...needs a stack of standards

Interoperability Standards

SEMANTIC SERVICE DESCRIPTION

OWL	OWL-S	SAWSDL	...
WSDL	EDDL	Device Class Profiles	...

Communication Standards

ISO-OSI

7	?	SoA-Services
6		OPC-UA
5		
4		TCP/IP
3		
2		Ethernet, WiFi, 5G
1		

Electromechanical Standards

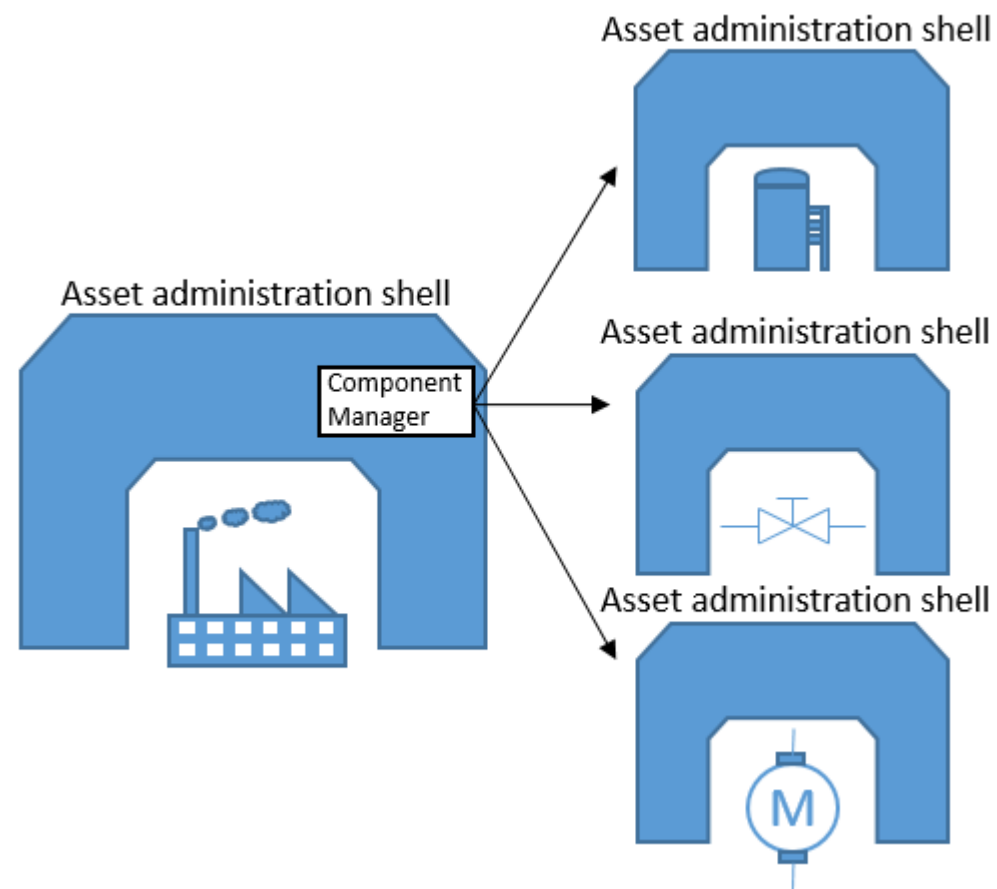

Han-Modular®

Standardization in progress

Reference architecture model RAMI 4.0

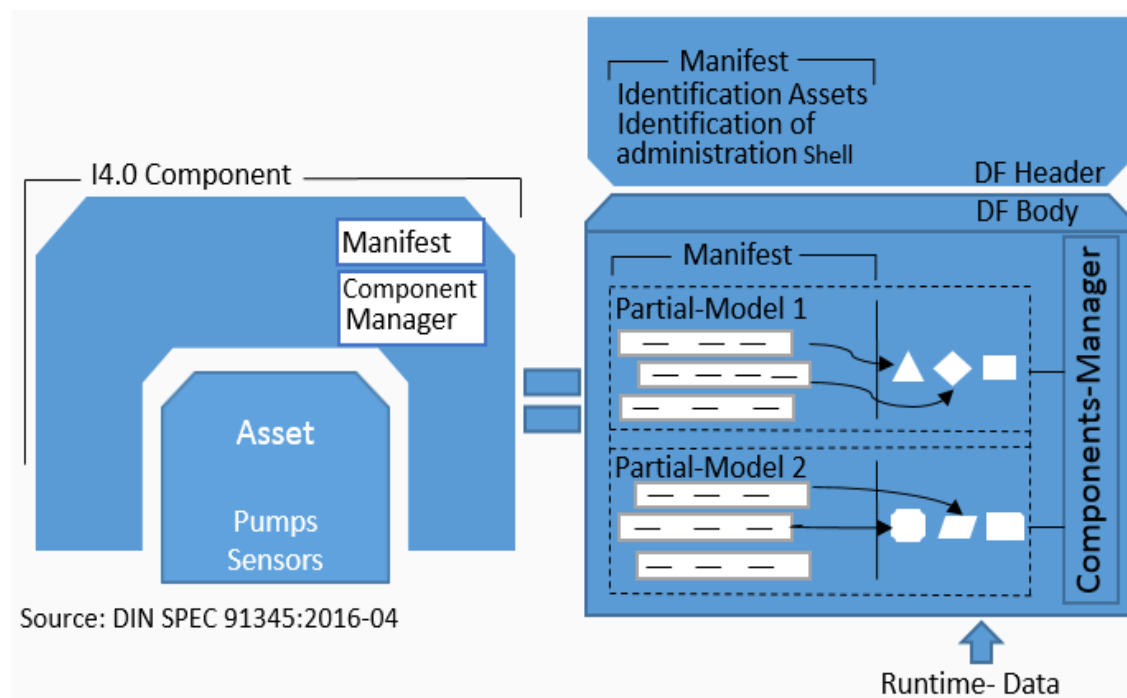

Asset Administration Shell

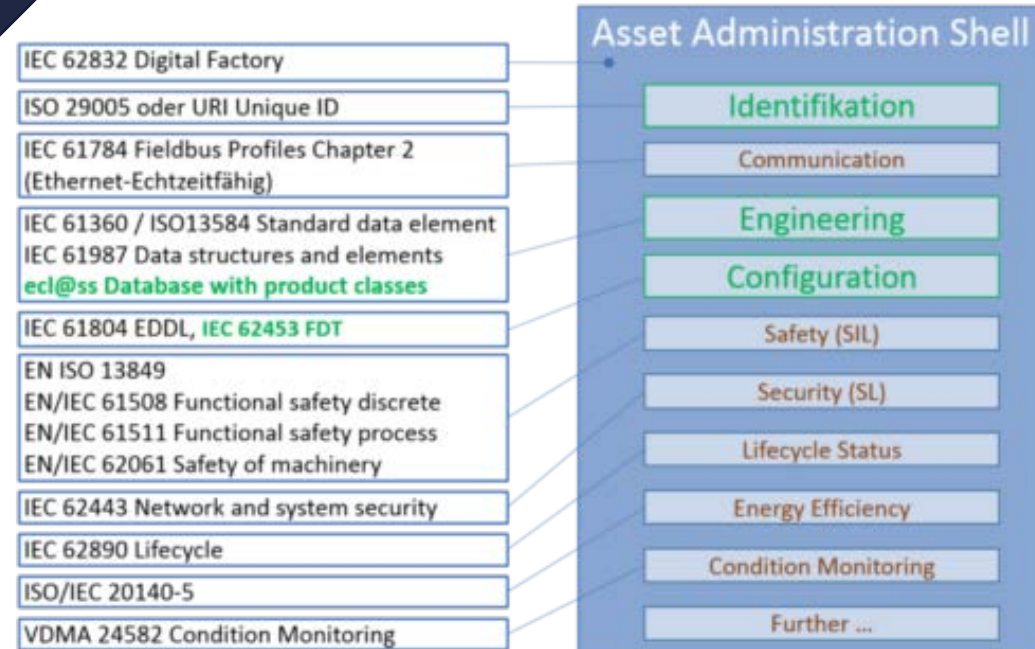

The open AAS model

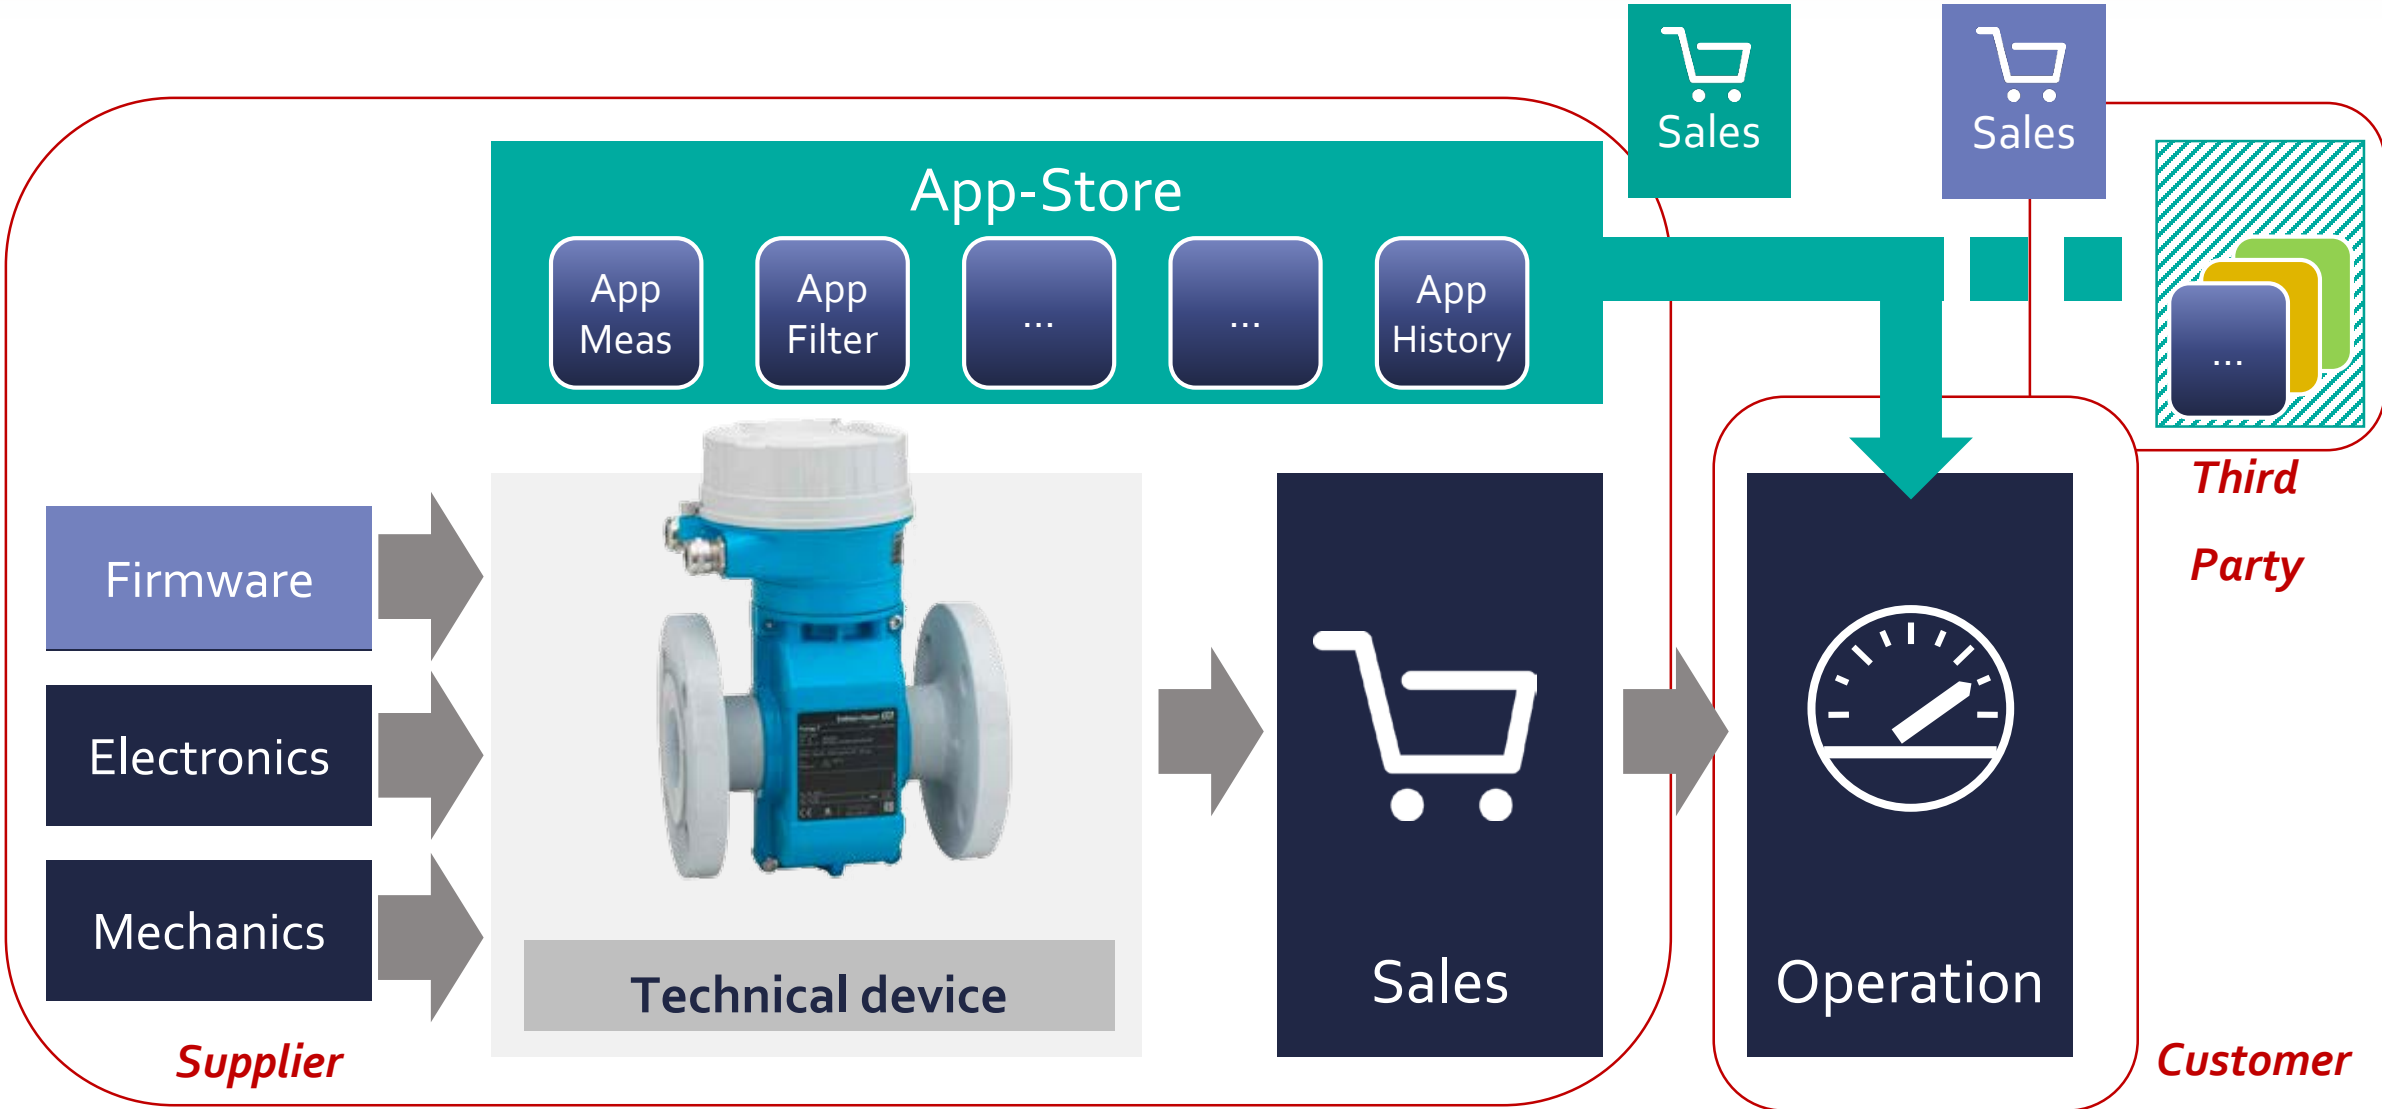

Asset administration shell

Asset Administration Shell

Separation of Hard- & Software

The human in the Industry 4.0 age...

will be
supported by smart
technologies

will have
more information
available

will have
higher mobility

must have more
interdisciplinary knowledge

needs additional
education and training

will have more responsibility
and freedom

- conclusion

From vision to reality – the SmartFactory^{KL}

<i>Launch:</i>	June 2005
<i>Legal form:</i>	registered non-profit association
<i>Members:</i>	50 (institutions only)
<i>Governance:</i>	general assembly, executive board
<i>Financing:</i>	fees, donations, projects
<i>Employees:</i>	currently 32
<i>Turnover:</i>	2.5 Mio €

The place of birth of INDUSTRIE 4.0

The **SmartFactory^{KL}** is the **worldwide biggest and most popular manufacturer independent research and demonstration center for INDUSTRIE 4.0 technologies.**

SmartFactory^{KL} Lab

SmartFactory^{KL} members

smartFactory^{KL}

Industry 4.0
vision

we Learn Work Build Present together

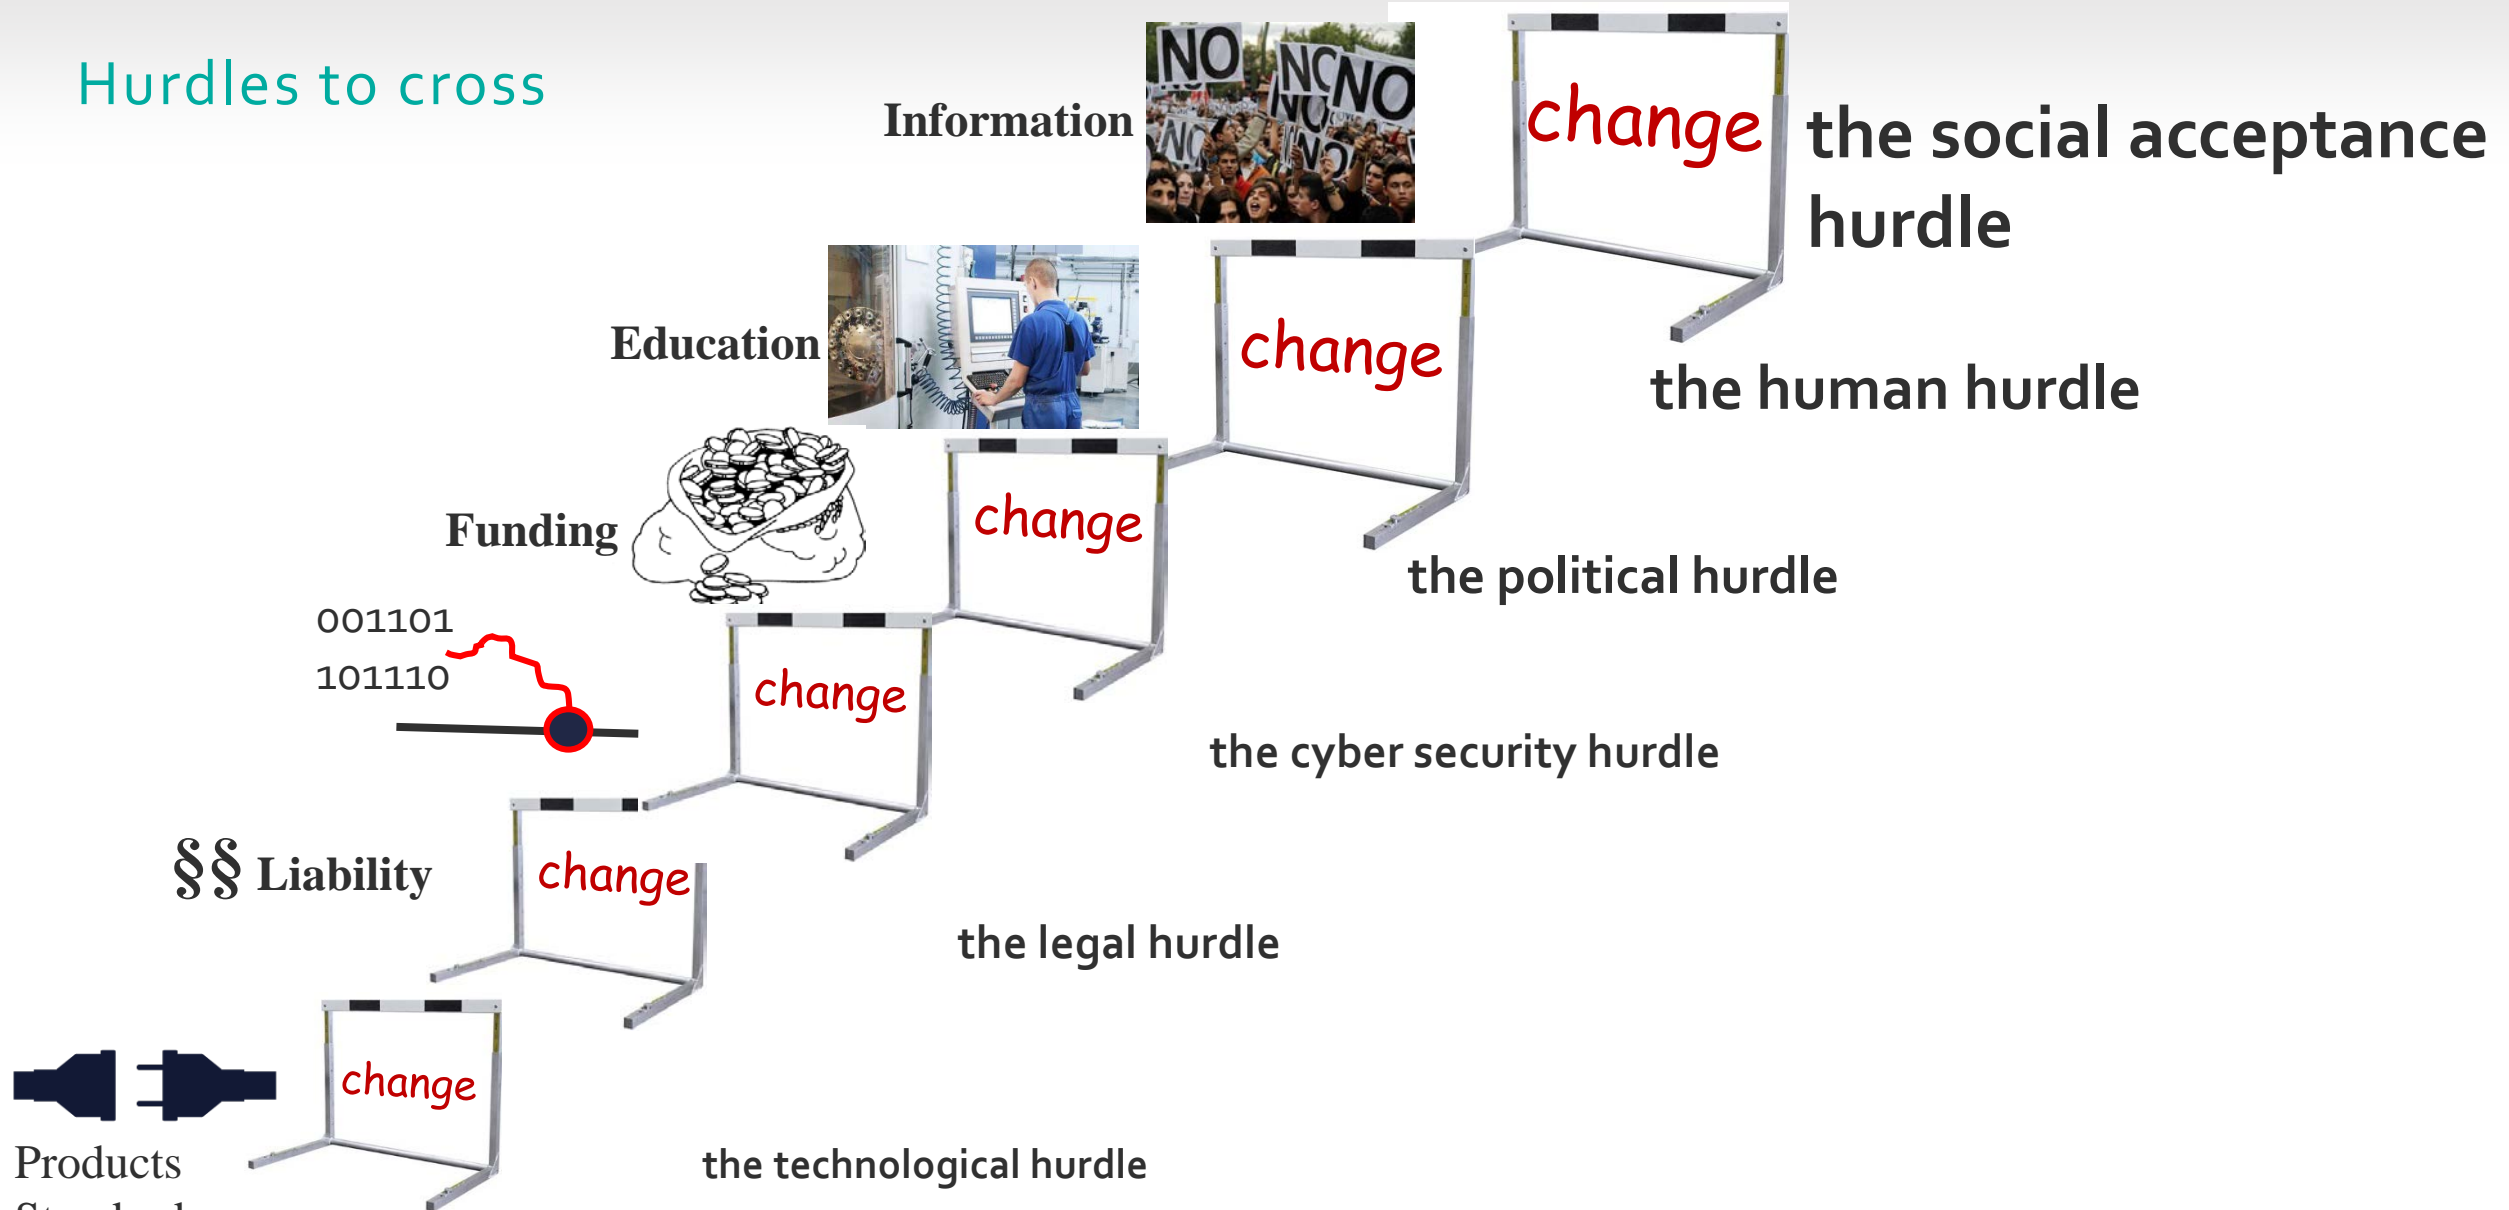

Industry 4.0
products

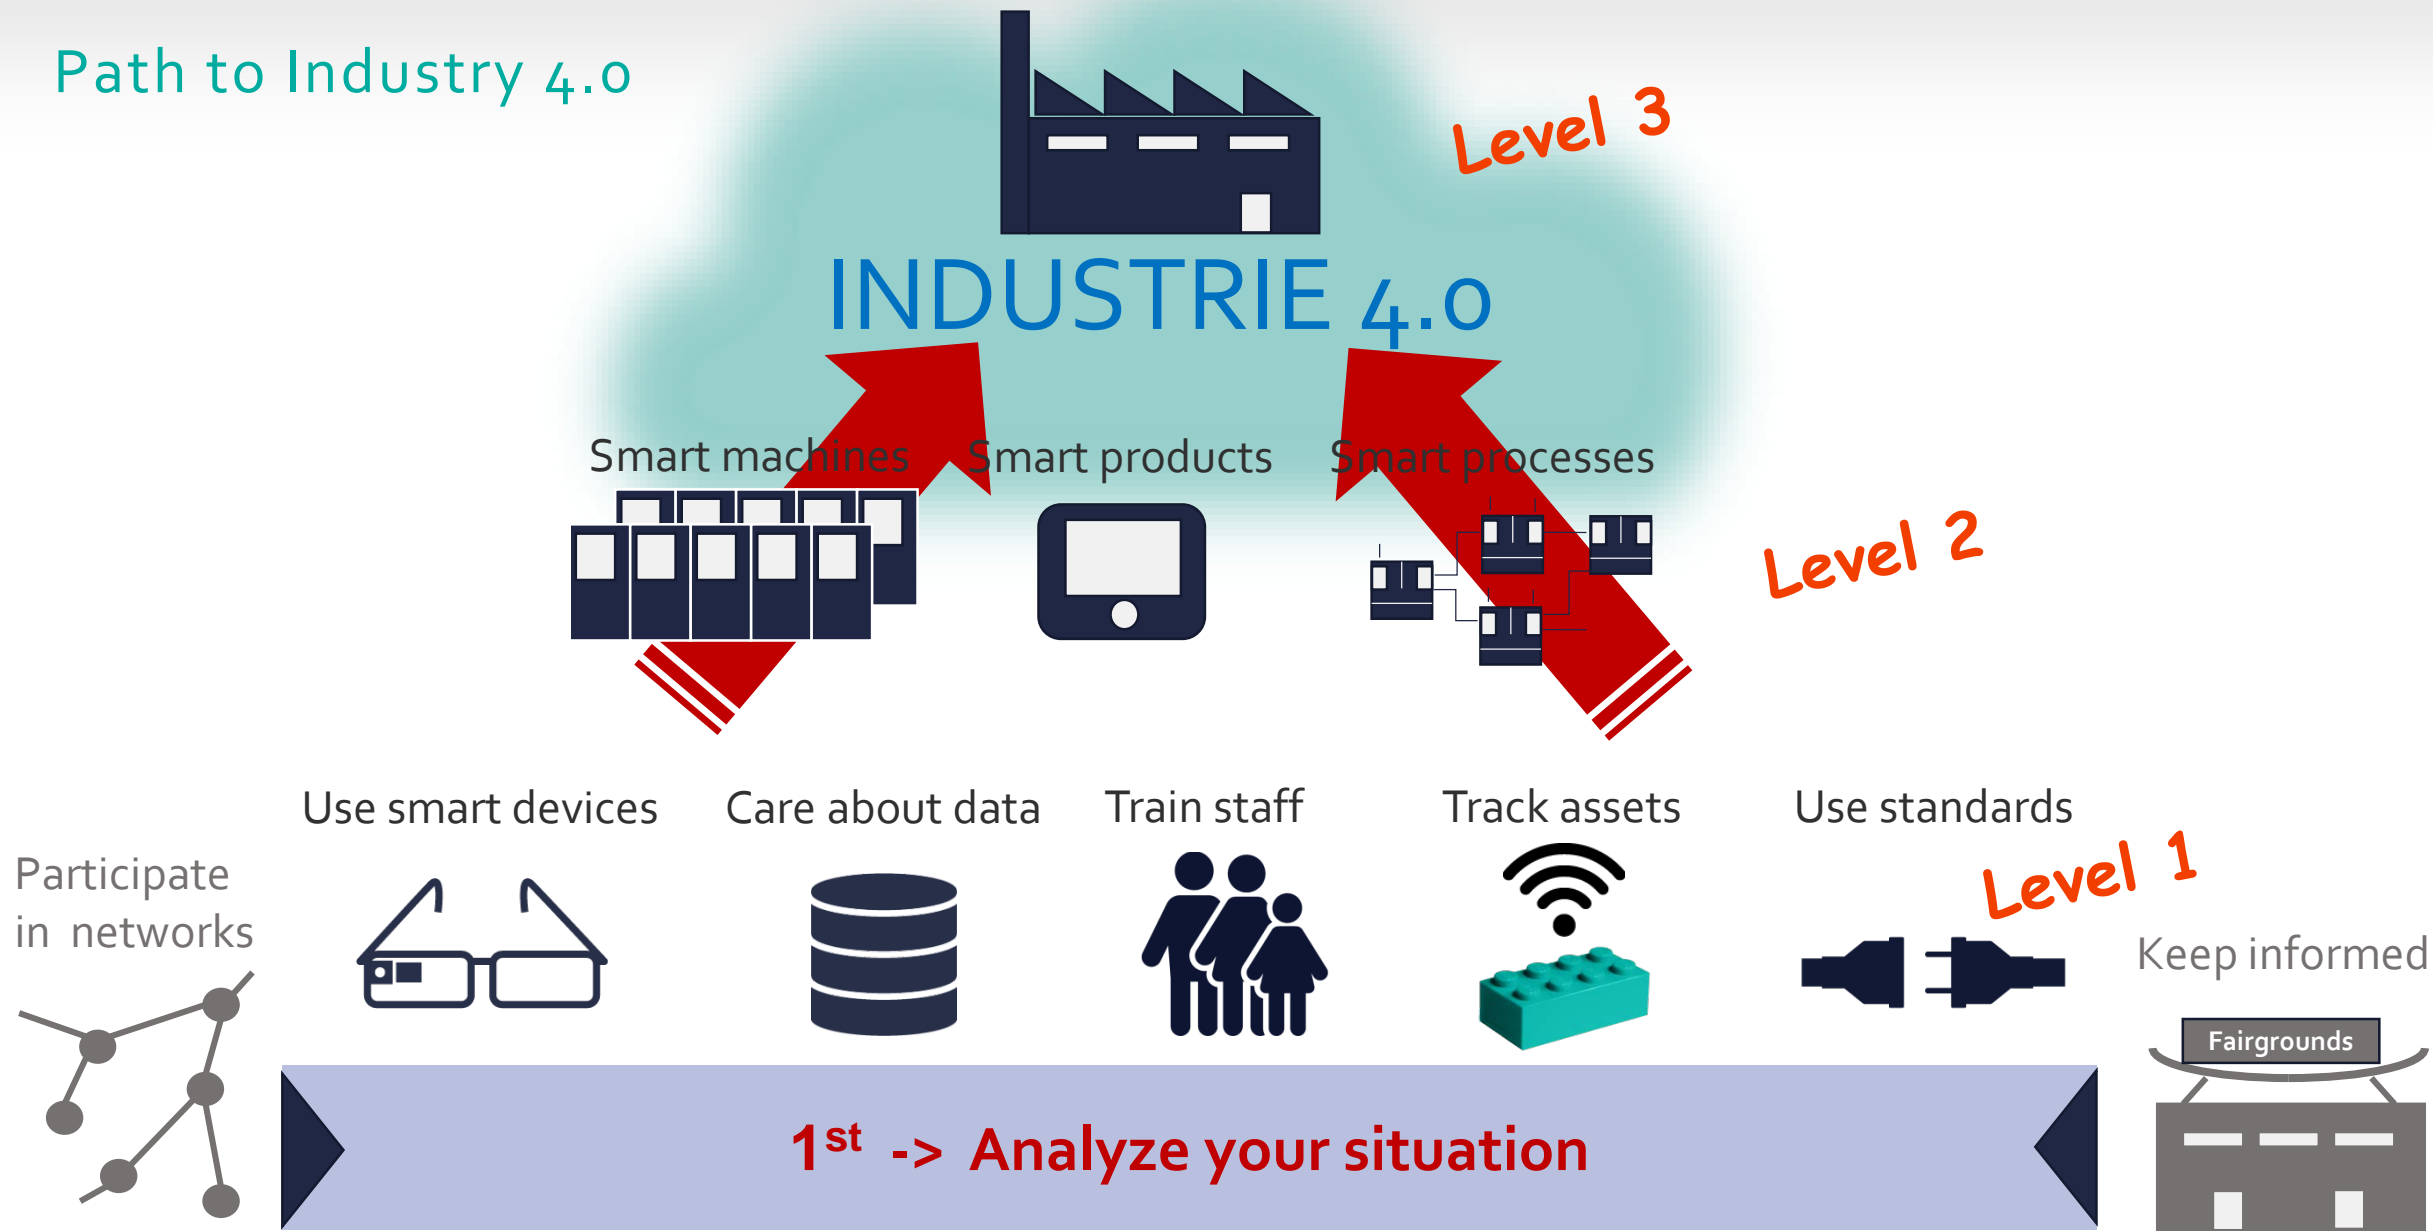

organized as a registered non-profit association

- conclusion

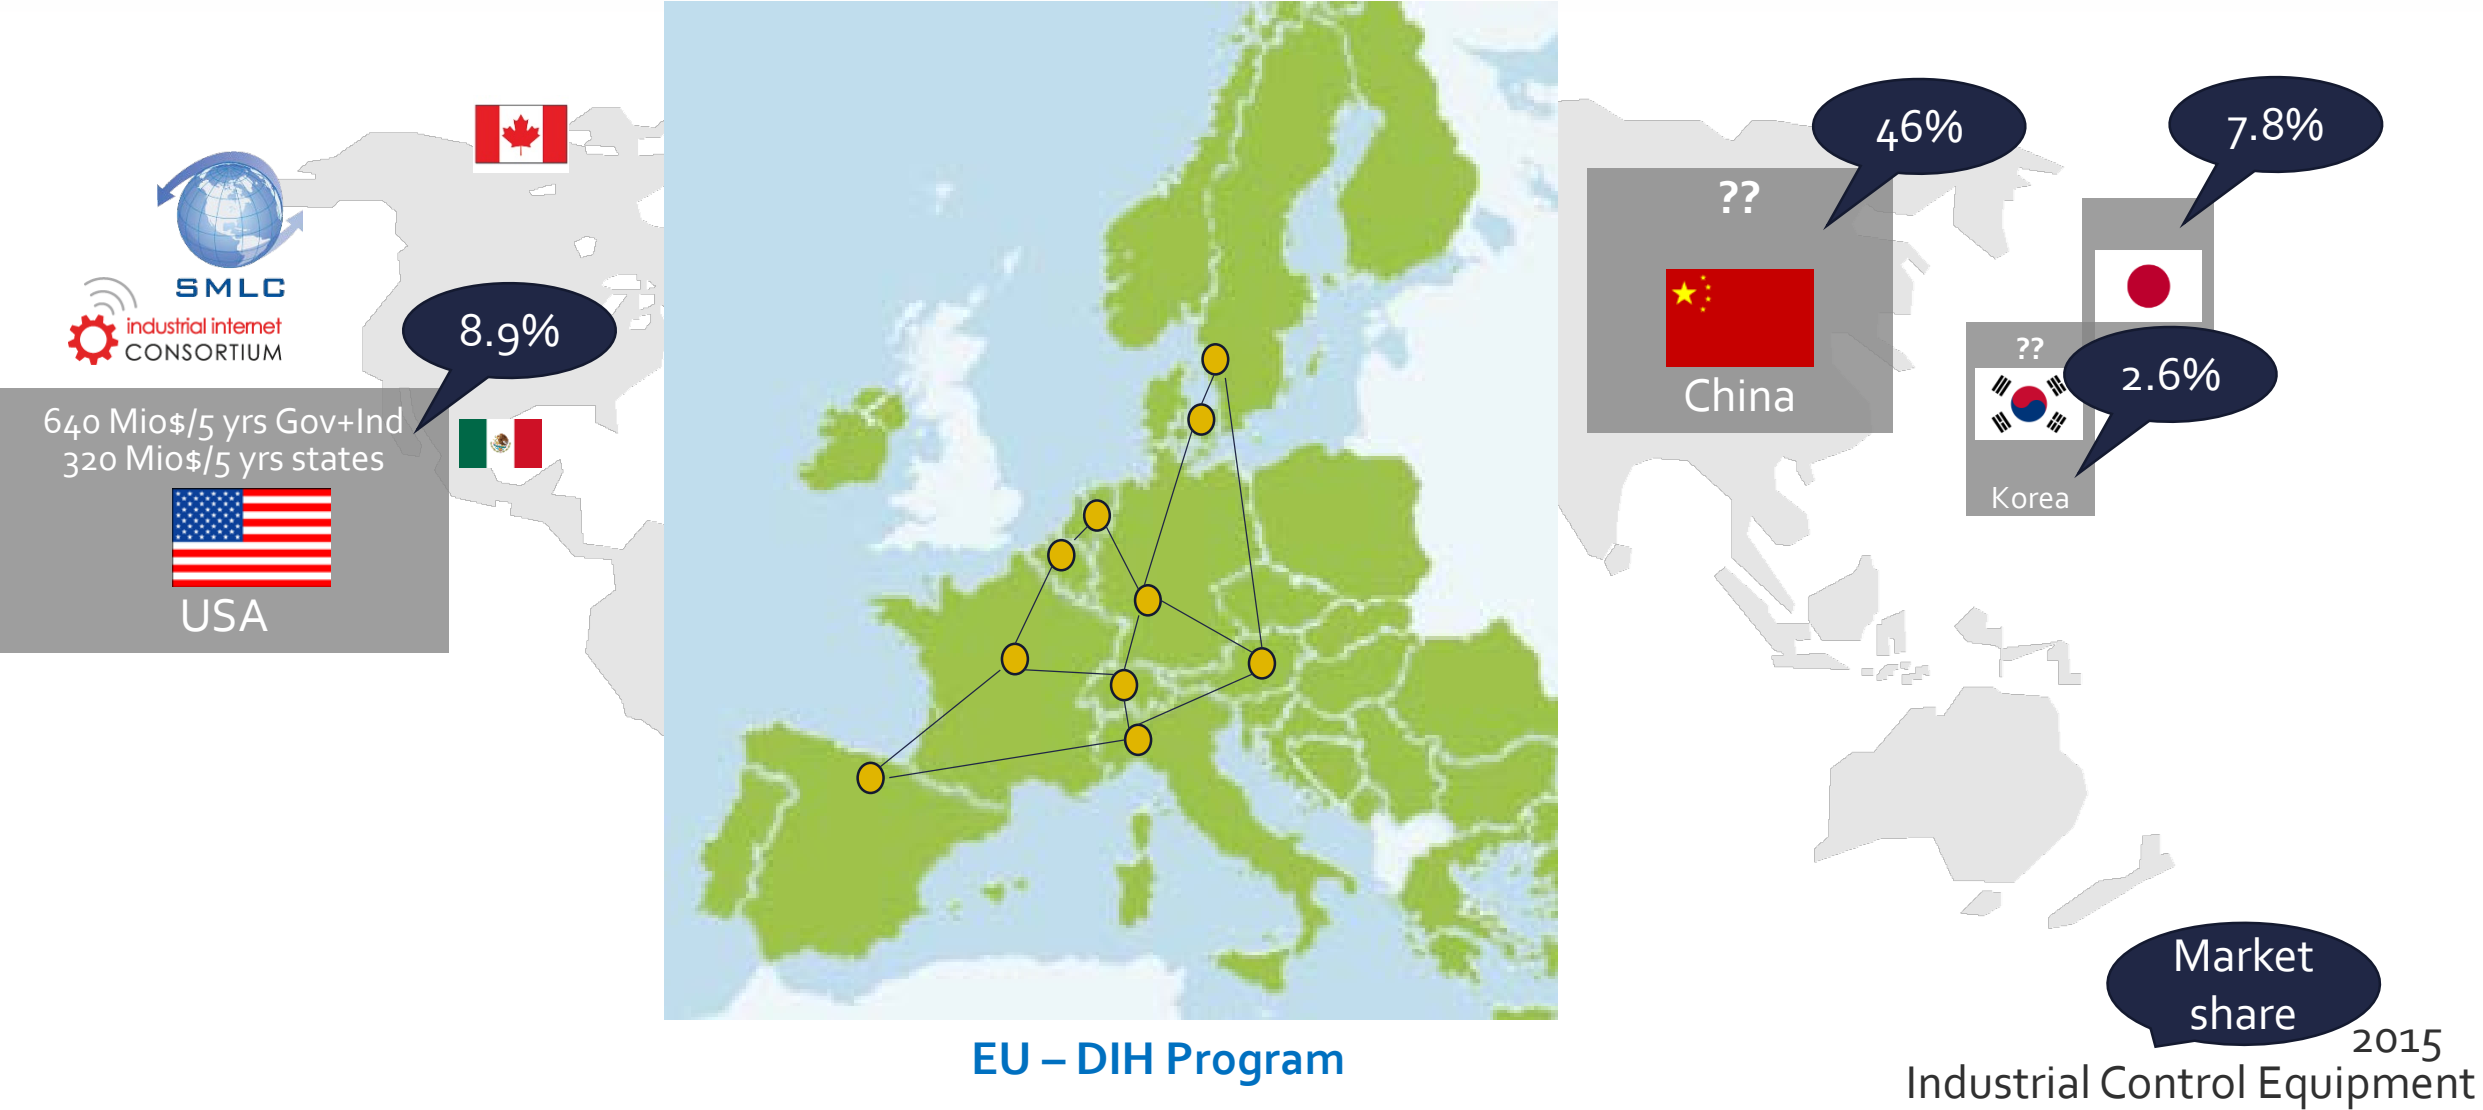

Hurdles to cross

Path to Industry 4.0

Industrie 4.0 worldwide competition

Thanks for listening
and remember

Everything should be made as simple as possible,
but no simpler !

Albert Einstein
